DESCRIPTION : Indfos Solenoid valves are normally closed type Electro-magnetic shut off valves, which on receiving an Electric impulse, open to allow flow in the pipe-lines.

APPLICATION : Type EVJ, EVJD valves are designed for fluorinated refrigerants R 12, R 22 and R 502. They are equally suitable for other mediums like water & air. However, these valves are not suitable for industrial applications involving flow of gases & oils.

TECHNICAL DETAILS : These valves are available with coils of different AC & DC voltages (as shown in table). The permissible deviations from rated coil voltage are:

Wattage : For AC Coil : 8W
For DC Coil : 12W
